

PIPELINES BRING US THE ENERGY WE NEED

Whether you are driving, flying or farming, pipelines bring energy to you.

ENERGY SOURCE

Pipelines deliver crude oil from where it's produced to the refineries that turn it into products we need.

AIRPORTS

Pipelines carry jet fuel airplanes need directly to airports.

NEIGHBORHOODS

Local neighborhood gas stations receive their gasoline and diesel from tanker trucks delivering fuels from regional storage facilities connected by pipelines to refineries.

RURAL AMERICA

Pipelines bring rural America propane for heating homes and barns, powering equipment and for drying crops.

SENSITIVE AREAS

Pipelines can be routed around sensitive areas, wetlands, urban centers and protected habitats.

UTILITY CORRIDORS

Pipelines can follow existing utility corridors avoiding new greenfield development.

Connecting us to affordable and plentiful energy,
pipelines make it easy for you to get where you need to go.
